EXPERIENCE

- **AI Engineer (Apprenticeship)** Oct 2025 – Oct 2027
Sagemcom Paris, France
 - Emotion recognition: developed facial-emotion recognition models.
 - Enterprise RAG assistant: contributed to an internal ChatBot (RAG) and agent/prompt engineering.
- **Waiter (Fixed-term contract)** Nov 2024 – Dec 2024
L'Eau À la bouche London, United Kingdom
 - Customer service: served customers in English; supported kitchen/front-of-house during peak hours.
- **Embedded Systems Engineer (Internship)** Jan 2024 – Feb 2024
Videlio Events Gennevilliers, France
 - Troubleshooting & repair: diagnosed and repaired hardware/software issues on electronic boards and monitors.

PROJECTS

- **Bioreactor AI Optimisation** December 2025
Hackathon: Hack The Fork – 2nd place winner among the best engineering schools in France
 - Developed ReaKt, an AI-powered bioreactor autopilot; ranked 2nd among top French engineering schools (Polytechnique, CentraleSupélec, etc.).
 - Implemented LSTM neural networks and Model Predictive Control (MPC) to predict fermentation dynamics and optimize metabolic yields.
 - Achieved real-time simulation and control algorithms in Python, dynamically adjusting environmental parameters to improve process efficiency.
- **On-device Speech Recognition**
Embedded AI
 - Embedded voice recognition: on-device speech recognition pipeline for constrained environments.
- **Computer Vision Projects**
Face & emotion recognition
 - Computer vision: facial recognition and facial-emotion recognition.
- **Web Projects**
Portfolio & nutrition app
 - Web/mobile: eliasmoussouni.fr and a diet tracking web/mobile application.
- **Self-balancing Gyropod**
Robotics
 - Robotics prototype: two-wheel self-balancing gyropod.

EDUCATION

- **ECE Paris Engineering School** Paris, France
Engineering degree — Artificial Intelligence & Data (Expected graduation 2027) Sep 2022 – Present
 - Relevant coursework: Computer science, data, AI, advanced mathematics, electronics.
- **Omnes Education London School** London, United Kingdom
International exchange semester — Artificial Intelligence May 2025 – Jul 2025
 - Focus: neural networks, MATLAB, probability & statistics, Java programming.

SKILLS

Technical Skills

Deep learning, machine learning, computer vision, LLMs/RAG, prompt engineering, embedded systems, FPGA/VHDL, Arduino, Git/GitHub, Linux/Ubuntu

Programming Languages

Python, C, Java, MATLAB, SQL, HTML, CSS, JavaScript, TypeScript

Soft Skills

Teamwork, autonomy, problem-solving, organization, project management, adaptability

LANGUAGES

French — Native

English — C1 (TOEIC 850)

Spanish — B1

EXTRACURRICULAR ACTIVITIES

IngLeague Co-founder & co-president (Mar 2024 – Aug 2025) — inter-class tournaments (400+ students), IngLeague.fr.

League of Legends Master rank (Feb 2020 – present).

American football Gaulois de Sannois (2019–2022) — Ile-de-France champion 2022.
